To Whom It May Concern

I am glad to have a chance to recommend Roland Kahlenberg for a position in your institution. During the past semester, Roland imparted his knowledge and skill to my 4th year students taking "Advanced Multimedia Theory and Development" course. Roland designed the video effects/animation module of the course and taught Adobe After Effects, a professional motion graphics and visual effects software program.

I was fortunate enough to attend this course together with my students. I found Roland to be hugely knowledgeable on the software and his teaching and communication skills were effective in terms of gaining and maintaining students' interest in the various topics we covered.

Roland also demonstrated a strong grasp of other related areas and that helped students to bridge their knowledge gained in this course with those from other courses that they have taken. I myself have attended some After Effects modules previously and I found that his lessons are by far the best structured and most efficient ones.

As well expected, students commented that his lessons were "great", "very well structured", "extremely useful for video editing", "very creative" and "one of the best elements of the course". I found that Roland's holistic approach in conducting this course was successful and led the students onto a path of knowledge that only an expert in his area could have paved.

I believe Roland is a person with incredible creative energies and a refreshing idealism tempered only enough to accomplish what needs to be done. I highly recommend him for any position of work, education, or any other capacity in which he can spread his knowledge and share his talents with others. At our institution, we are looking forward to having Roland conduct his course(s) for our future students.

Thank you once again for the opportunity to recommend such a special and impressive man.

Sincerely,

Lee Jae-Shin
